Attention Dr. Waqar Hussain

Dear Dr Hussain

Re: STERiZAR Food Safe

Further to our discussions we can confirm that STERiZAR does not contain any product in the formulation that will leave a residue that will stain a stainless steel surface, or taint food, hence it can be considered "FOOD SAFE"

As we do with all statements we have had STERiZAR independently tested at an internationally recognised microbiological testing laboratory to confirm the above statement.

Yours sincerely

Nigel Oakes
Managing Director
