

Patients Put Their Trust in Your Hands

HiClean

Advanced Barrier Control

Incorporating
STERiZAR

**Long-Acting Sanitiser
and Disinfectant**

HALAL CERTIFIED

Confidence and Trust in Your Hands

STERiZAR was developed as a unique range of sanitising products for healthcare, industries and home.

Selected cationic Biocides gives **STERiZAR** the effectiveness to destroy bacteria yet remain harmless to the environment, providing a formulation with:

No irritants

Alcohol-**free**

Advanced Barrier Protection that lasts up to **6 hours** on hands and **30 days** on hard surfaces **after only 1 application!**

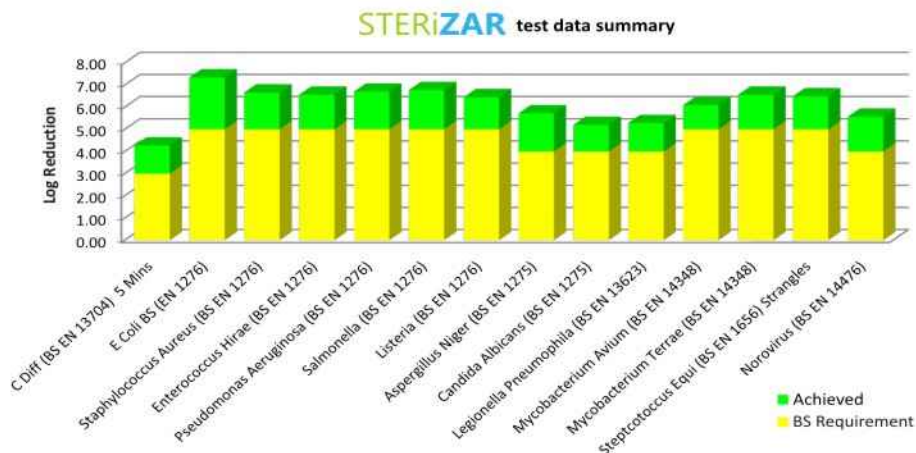

How It Works

HiClean (**STERiZAR**) combines a physical effect with a chemical control, provided by selected biocides. The physical properties interfere with the formation of a biofilm substantially reducing the microorganisms' ability to reproduce, which increases the 'age' of the colony making it vulnerable to chemical controls. Complete sanitisation with effective killing of common harmful viruses and 99.999% of bacteria.

Proven Efficacy

STERiZAR has undergone stringent testing, including **MRSA, C Diff, E Coli, NDM-1, Norovirus and** many others tested to BS standards.

The above graphed information shows a summary of the bacterial tests carried out on **STERiZAR** and the results achieved against the British Standard requirement. All tests carried out at Abbott Analytical, UK (independent test laboratory).

STERiZAR with Advanced Barrier Protection Tested BS EN 13697 to show treated areas remain contamination free for a minimum period of 30 days.

Safety

HiClean (STERiZAR) is Alcohol-free so it is:

- ▶ 100% non-flammable - No fire risk
- ▶ Non-Toxic - Safe for both users and patients, neutral PH
- ▶ Non-corrosive - Safe for equipment and surfaces
- ▶ Resistance does not develop because of quick and physical mode of action
- ▶ Halal Certified - food safe

Skin Sensitivity Test: **STERiZAR** no adverse or dermatological effect when in contact with human skin for 24 hours.

No residual organoleptic effect of **STERiZAR** when used to clean hard surfaces.

A New Approach to Infection Control

HiClean (STERiZAR) is being used throughout the Medical, Education and Domestic sectors offering long lasting, cost effective sanitising solutions.

- ◆ **Nonirritant**
- ◆ **Effective in less than 1 Minute**
- ◆ **Alcohol-free**
- ◆ **Non-flammable**

Hand Foam Sanitiser

Advanced Barrier Control protects hands up to **6 hours**

Foam dispenser uses 30% less sanitiser therefore reducing costs

Kind to skin, non irritating formula

Safe to use even on children (of all ages)

Hard Surface Cleaner Sanitiser

Advanced Barrier Control protects surfaces up to **30 days**

Reduces hygiene cleaning cost and improves cleaning effectiveness

Remains active even when dry

Environmentally friendly

Proven Safe to use in OR, ICU, PICU, NICU

STERiZAR is manufactured by and locally packed under authorization from:
